## Company Details

**K**ATGO CONSTRUCTION COMPANY is a civil construction company trading under a registered name; KATGO CONSTRUCTION CO.LTD. It is a privately owned company that was established in 2008 with the goal of taking the current flagship in construction and growing it within Uganda and in the international spheres. This has been achieved by the trust and quality that our customers have come to rely on.

The primary function of the company is to provide construction services to developers, funding agents and developing organizations. Our management and staff have a complimentary experience in project management, production management and site supervision

## COMPANY POLICY

### MISSION

To manage projects efficiently and effectively by being a customer focused Construction Company.

Meeting and/or exceeding customer expectation with regard to civil construction outputs and capitalizing on use of Project management principles:

- Directing and coordinating resources
- Scope and time management
- Quality management

Participation to achieve project goals achievement

### VISION

To become the preferred service provider in the management of programs and projects in various civil engineering disciplines/fields based on the capabilities of the organization.

### VALUES

KATGO CONSTRUCTION CO LTD team works together to ensure our customers' ultimate success by means of:

- ✚ Competence
- ✚ Integrity
- ✚ Commitment
- ✚ Passion
- ✚ Professionalism

Our team spirit runs from top management down, with our extensive internal and external staff training and motivation programs. We regularly contribute to various charity organizations and take part in many sponsorships thus incorporating team spirit.

With a staff compliment of just under 100, we are well represented in Uganda.

### AIM AND OBJECTIVES

- ✚ To ensure client satisfaction
- ✚ To actively involve the social community into self-development
- ✚ To actively work towards improving skills of the social community and their young generations.
- ✚ To alleviate poverty through creation of employment and development

## Description of Company's Activities

### 1. Building construction

KATGO Construction Company serves mainly in construction, maintenance and repair of all types of buildings and houses. This company has a very good reputation in delivering best quality works and we have always been highly rated by our former customers.

The company carries out all sorts of building construction to meet the needs of our clients who are at different income levels. We carry out construction in phases where the source of finance is not consistent or we may execute the whole work to completion if the client can provide 75% of the contract sum at the start of the project and the remaining 25% can be paid after the work has been completed.

The KATGO building construction team comprises of well experienced and skilled members to deliver just as per the client's dream and needs.

### 2. Plumbing

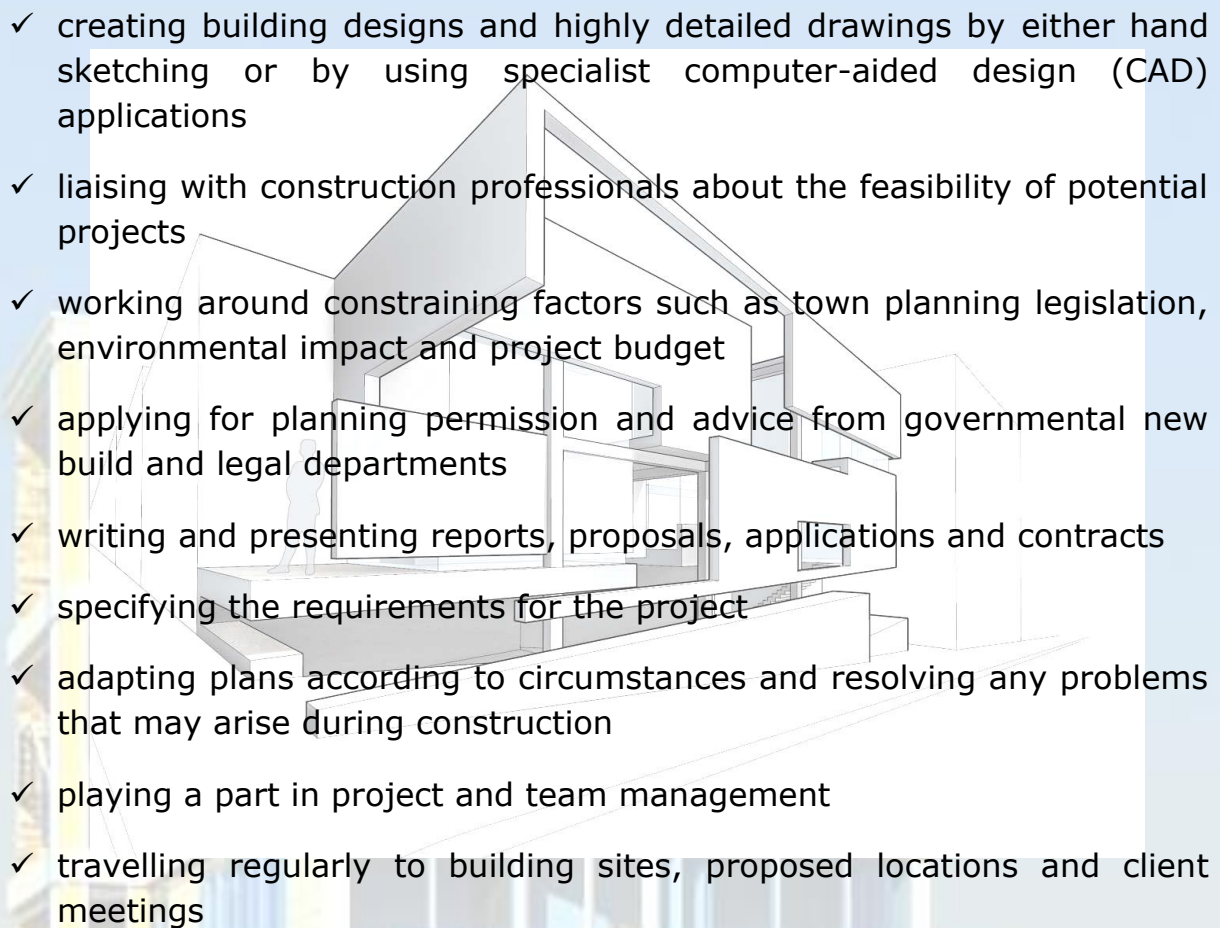

We interpret blueprints and building specifications to map layout for pipes, drainage systems, and other plumbing materials, Install pipes and fixtures, such as sinks and toilets, for water, gas, steam, air, or other liquids, Install supports for pipes, equipment, and fixtures prior to installation.

### 3. Architectural works

KATGO Construction Company has competent personnel that create designs for new construction projects, alterations and redevelopments. We use our specialist construction knowledge and high-level drawing skills to design buildings that are functional, safe, sustainable and aesthetically pleasing.

Our Architects stay involved throughout the construction process, adapting their plans according to budget constraints, environmental factors or client needs. As such, they operate as part of an overall project design team, working closely with a range of construction professionals from quantity surveyors to building services engineers.

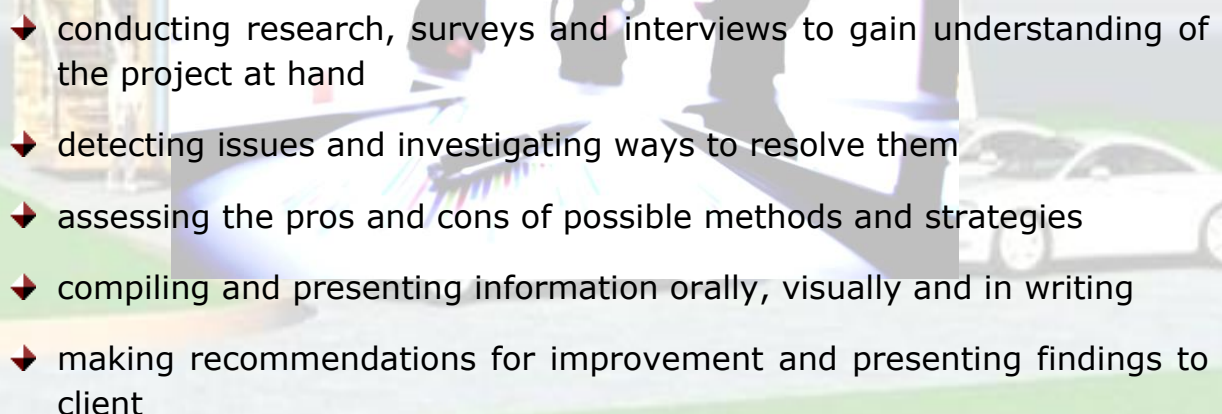

Typical work activities done by our Architects include:

- 
- ✓ creating building designs and highly detailed drawings by either hand sketching or by using specialist computer-aided design (CAD) applications
  - ✓ liaising with construction professionals about the feasibility of potential projects
  - ✓ working around constraining factors such as town planning legislation, environmental impact and project budget
  - ✓ applying for planning permission and advice from governmental new build and legal departments
  - ✓ writing and presenting reports, proposals, applications and contracts
  - ✓ specifying the requirements for the project
  - ✓ adapting plans according to circumstances and resolving any problems that may arise during construction
  - ✓ playing a part in project and team management
  - ✓ travelling regularly to building sites, proposed locations and client meetings

#### **4. Consultancy**

We offer advice and expertise to our clients to help them take up better and possible ideas, improving their dreams and solving their problems that are in line with engineering/construction.

The consultancy work we carryout include;

- 
- conducting research, surveys and interviews to gain understanding of the project at hand
  - detecting issues and investigating ways to resolve them
  - assessing the pros and cons of possible methods and strategies
  - compiling and presenting information orally, visually and in writing
  - making recommendations for improvement and presenting findings to client

- implementing agreed solutions

## 5. Land Surveying

KATGO Construction Company has a team of well equipped and skilled surveyors that make exact measurements and determine property boundaries. Provide data relevant to the shape, contour, gravitation, location, elevation, or dimension of land or land features on or near the earth's surface for engineering, mapmaking, land evaluation, construction, and other purposes.

As Land Surveyors, KATGO Construction Company offers the following services;

- ⊕ Verify the accuracy of survey data, including measurements and calculations conducted at survey sites.
- ⊕ Direct or conduct surveys in order to establish legal boundaries for properties, based on legal deeds and titles.
- ⊕ Record the results of surveys, including the shape, contour, location, elevation, and dimensions of land or land features.
- ⊕ Calculate heights, depths, relative positions, property lines, and other characteristics of terrain.
- ⊕ Write descriptions of property boundary surveys for use in deeds, leases, or other legal documents.
- ⊕ Plan and conduct ground surveys designed to establish baselines, elevations, and other geodetic measurements.
- ⊕ Search legal records, survey records, and land titles in order to obtain information about property boundaries in areas to be surveyed.
- ⊕ Coordinate findings with the work of engineering and architectural personnel, clients, and others concerned with projects.
- ⊕ Adjust surveying instruments in order to maintain their accuracy.
- ⊕ Train assistants and helpers, and direct their work in such activities as performing surveys or drafting maps.

- ✦ Compute geodetic measurements and interpret survey data in order to determine positions, shapes, and elevations of geomorphic and topographic features.

## 6. Electrical works

KATGO Construction Company is blessed with a team of competent Electrical engineers who design, develop, test electrical devices and equipment and do electrical installation in buildings.

Among the Electrical Engineer Responsibilities, KATGO Construction Company offers the following:

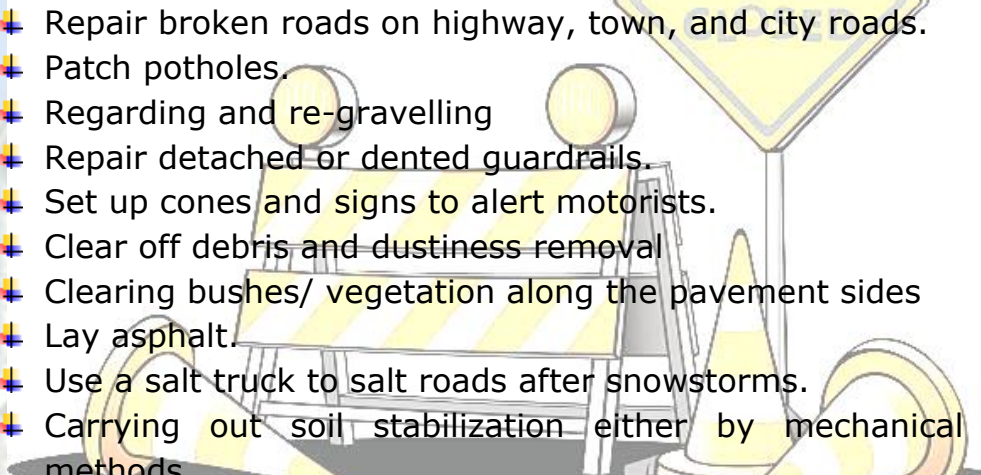

- Designing, maintaining, implementing, or improving electrical instruments, facilities, components, equipment products, or systems for industrial, commercial or domestic purposes.
- Conferring with customers, engineers, and others to discuss existing or potential engineering products or projects.
- Ensuring that installation and operations conform to standards and customer requirements by preparing electrical systems specifications or technical drawings.
- Ensuring compliance with specifications, codes, or customer requirements by directing or coordinating installation, manufacturing, construction, maintenance, documentation, support or testing activities.
- Writing reports and compiling data regarding existing and potential electrical engineering projects and studies.
- Preparing specifications for purchases of electrical equipment and materials.
- Supervising or training project team members.
- Estimating material, labor, or construction costs for budget preparation.
- Maintaining electrical equipment.

## 7. Road Construction and Maintenance

This company has the ability to reconstruct a new road way or rehabilitate, renovate or maintain an existing one using the modern state of the art tools, equipment and plants or with the labour based methods and techniques we

have. The company can take responsibility for preparing broken and eroding pavement on highways, rural, and municipal roads. Repairs runways and rights-of-way and clears debris from roads.

Primary works done under road construction and maintenance section include;

- 
- ✚ Repair broken roads on highway, town, and city roads.
  - ✚ Patch potholes.
  - ✚ Regrading and re-gravelling
  - ✚ Repair detached or dented guardrails.
  - ✚ Set up cones and signs to alert motorists.
  - ✚ Clear off debris and dustiness removal
  - ✚ Clearing bushes/ vegetation along the pavement sides
  - ✚ Lay asphalt.
  - ✚ Use a salt truck to salt roads after snowstorms.
  - ✚ Carrying out soil stabilization either by mechanical or chemical methods.
  - ✚ Operate motor graders, brooms, loaders, backhoes, backhoes, tractors, mowers, dump trucks, or similar equipment.
  - ✚ Patrol roads for hazards like cracking and suggest maintenance/repair needs.
  - ✚ Place stop signs and speed limit signs along road.
  - ✚ Construction, maintenance and repair of the drainage system to ensure proper conveyance of storm water
  - ✚ Installation of road signs and symbols
  - ✚ Inspection and maintenance of operating equipment.
  - ✚ Installation and cleaning of culverts.
  - ✚ Flag traffic to form a detour around construction.

## 8. Project Management

KATGO Construction Company manages key client projects. Responsibilities of the company as a project manager include;

- 
- ✓ Coordination and completion of projects on time within budget and within scope.
  - ✓ Oversee all aspects of projects.
  - ✓ Set deadlines
  - ✓ Assign responsibilities and monitor and summarize progress of project.
  - ✓ Prepare reports for upper management regarding status of project.

- ✓ We work directly with clients to ensure deliverables fall within the applicable scope and budget, coordinate with other departments to ensure all aspects of each project are compatible and hire new talent as needed to fulfill client needs.

## **9. Bulk earthworks**

Under this section, works carried out include; the removal, moving or adding of large quantities of soil or rock from a particular area to another. These activities are done in order to make an area a suitable height and level for a specific construction purpose.

Bulk earthworks are needed in order for a wide range of construction projects to be done. This can include the building of Roads, Mines, Highways, Railways, Causeways, Levees, Dams, Canals, Trenches, Residential and commercial buildings.

## **10. Metal fabrication**

The company has a well experienced team of metal fabricators who produce steel and aluminum doors, windows, gates, and all works in line with welding at the company's offices. The team makes these products both for the company's projects and for sell at a very low and negotiable price.

## **11. Steel bending**

The company owns a steel bending team for hire on projects other than those run by the company. These come well equipped just to carry out the steel bending work on time and as per the structural engineer's specifications

## **12. Hardware services**

The company also runs a well stocked hardware at her office building 5km along Gayaza-Kalagi Road. This provides supplies for the company's projects and sells to other people at a lower (factory) price.

## **13. Supply of building materials, equipments for hire and labour**

KATGO Construction Company owns a variety of construction equipment for use on her own construction projects and for hire to other construction sites.

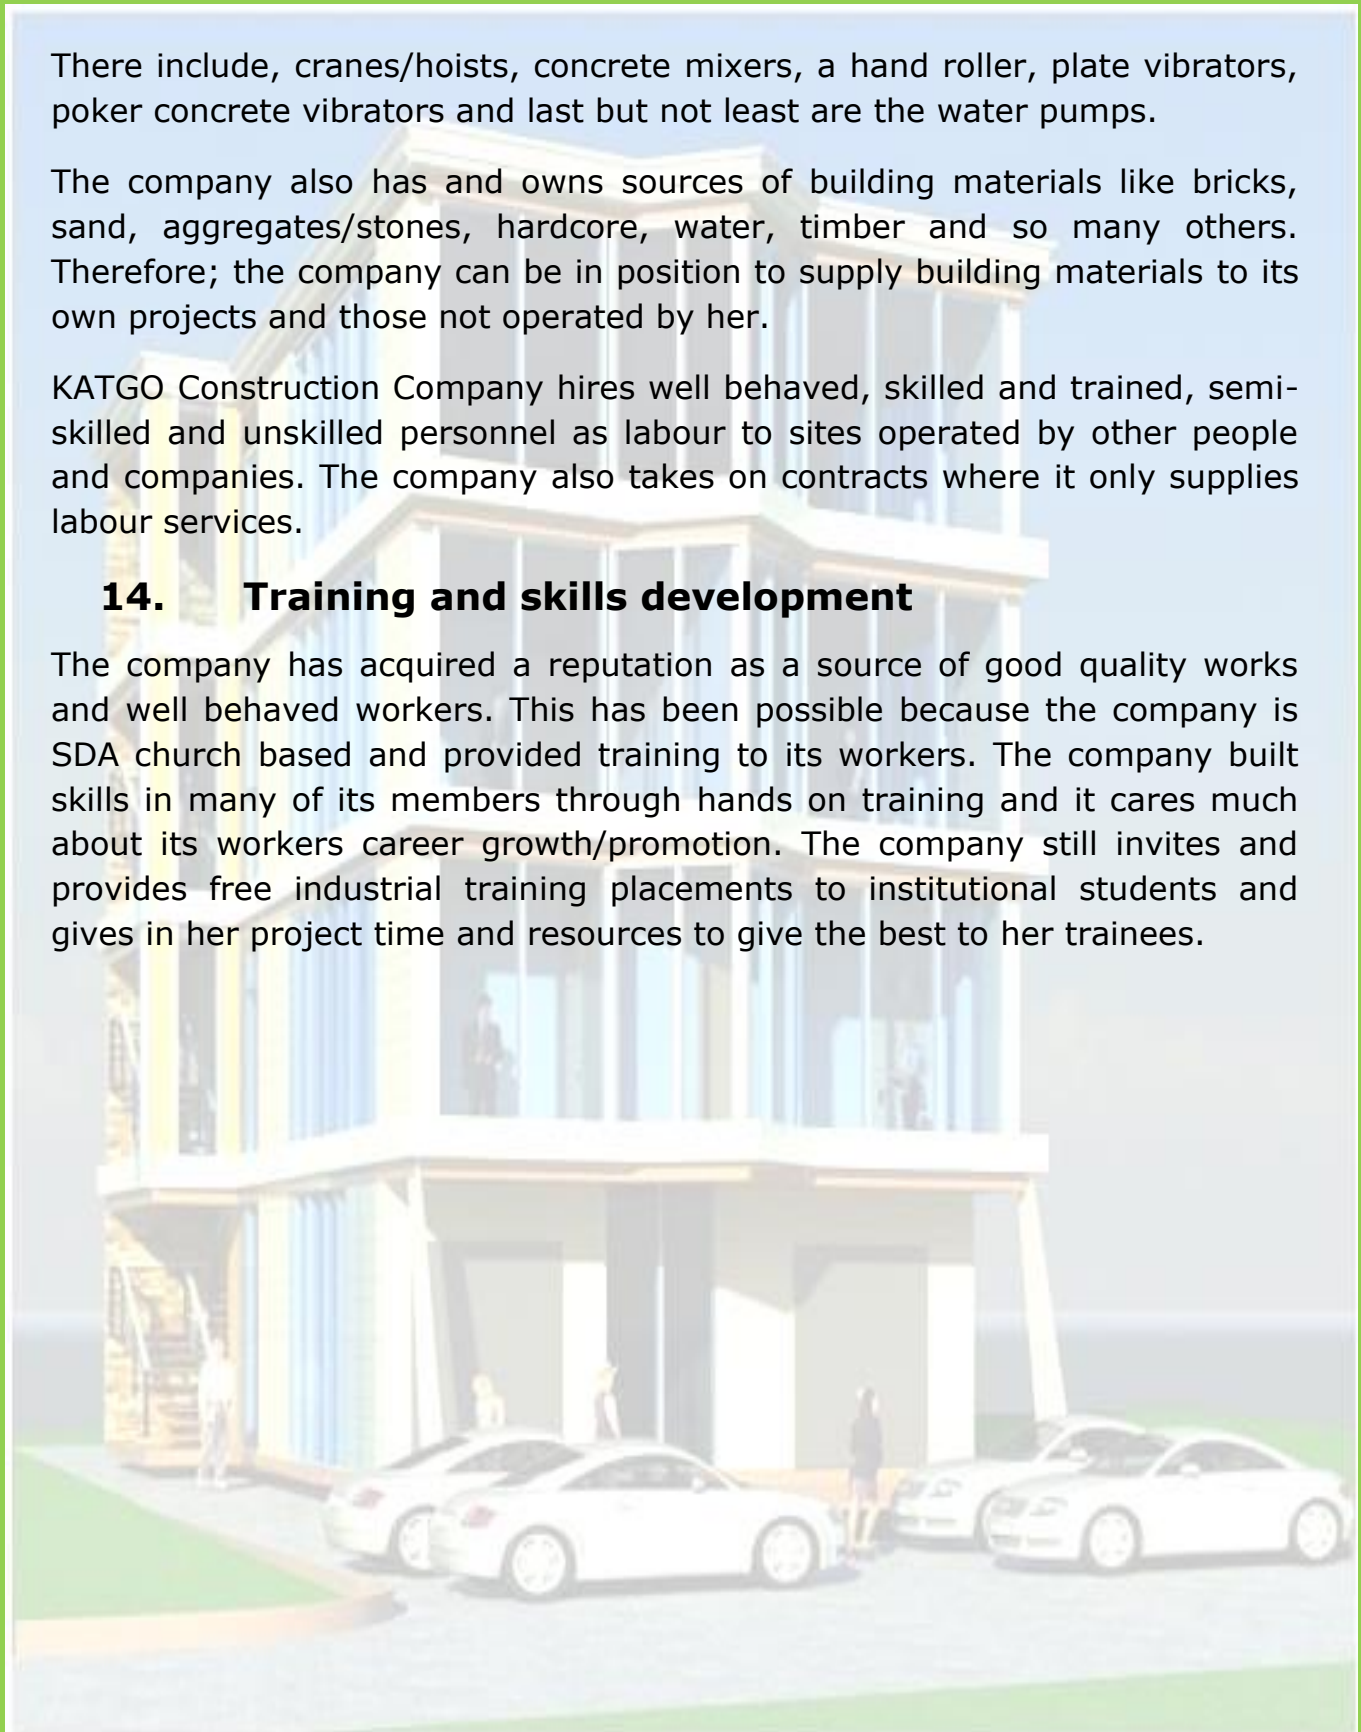

There include, cranes/hoists, concrete mixers, a hand roller, plate vibrators, poker concrete vibrators and last but not least are the water pumps.

The company also has and owns sources of building materials like bricks, sand, aggregates/stones, hardcore, water, timber and so many others. Therefore; the company can be in position to supply building materials to its own projects and those not operated by her.

KATGO Construction Company hires well behaved, skilled and trained, semi-skilled and unskilled personnel as labour to sites operated by other people and companies. The company also takes on contracts where it only supplies labour services.

#### **14. Training and skills development**

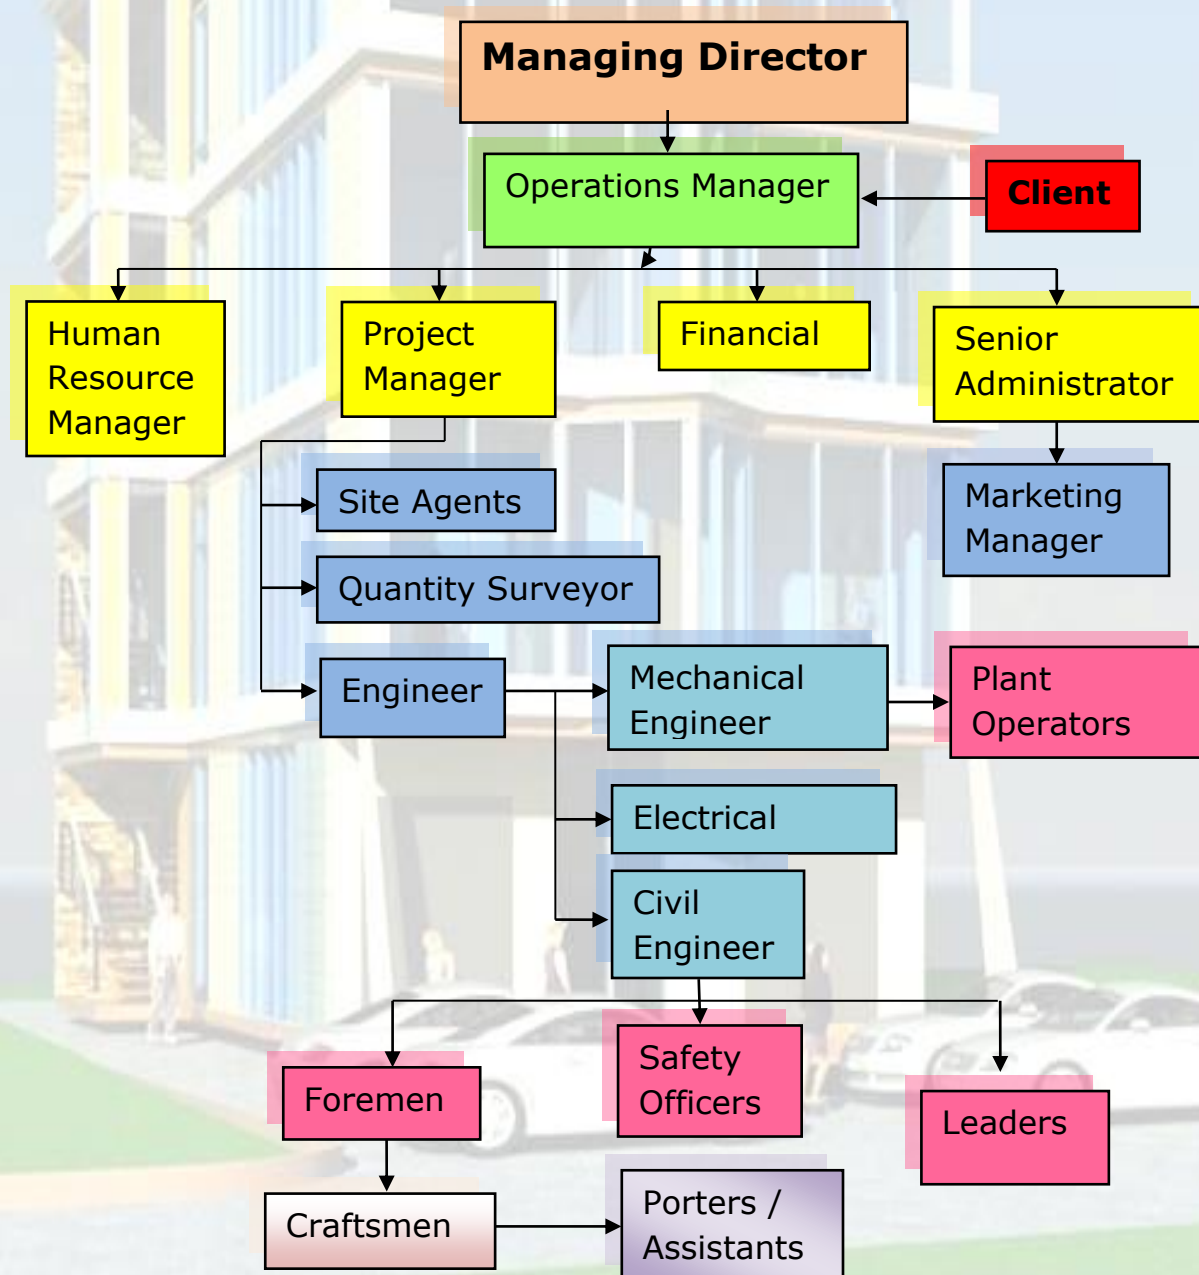

The company has acquired a reputation as a source of good quality works and well behaved workers. This has been possible because the company is SDA church based and provided training to its workers. The company built skills in many of its members through hands on training and it cares much about its workers career growth/promotion. The company still invites and provides free industrial training placements to institutional students and gives in her project time and resources to give the best to her trainees.

## The KATGO Management Structure

In pursuit of the company's aim of maintaining an organization which is competent, highly motivated and result oriented, KATGO CONSTRUCTION CO LTD has made it a policy to recruit, develop and motivate only the best and brightest as its members, people who are able to demonstrate their professional competence, courage and integrity in performing tasks every day and in every way.
